	(3)	1	B			4	F
		2	B			5	C
		3	A				

VI

1. Almost 70% of the people in the survey answered that printed books were better when sharing with others, whereas only a fourth preferred e-books.
2. When reading books in bed, the percentage of who preferred e-books over printed books was slightly higher at 45%, than those who preferred printed books, which was 43%.

VII

I prefer reading e-books over printed books for two main reasons, convenience and sustainability. First of all, e-books are lighter and easier to carry around because they can be stored on a single electronic device. With e-books, it is possible to have a wide array of books at your disposal anywhere and anytime, whereas it would be physically tiresome to carry even one printed book. Also, e-books are environmentally friendly when compared to printed ones. Printed books require more resources, meaning many trees are destroyed in order to create the paper used for them, but e-books only require digital screens. For these reasons that they are beneficial for both the environment and the people, I prefer reading e-books.
